## → MIRROR, MIRROR

"There's been a real boom in antique mirrored furniture of late. I have some at home that dates from the 1920s and 1930s, but it's actually timeless and works with any interior from country-house to minimalist – it all depends on the way you style it. It's brilliant because it's neutral – it's colourless, so it goes with everything – but it's also very feminine and adds instant glamour."
