TREASURE CHEST

Some call it functional art, but Studio Job prefers to call their work a return to “decorative arts.” The Antwerp-based duo is known for creating ironic pieces with art as the underlying foundation. Such is the hand-painted “Altdeutsche” chest, which calls to mind the cheeky aesthetic of the pop art movement as well as Keith Haring’s penchant for dynamism and color.

MOVING EXHIBITION

Decades after their creation, Alexander Calder’s kinetic sculptures continue to enthrall. He is the most popular proponent of the mobile, whose components appear in Michael Anastassiades’s chandeliers. The stunning lighting sculptures appear sturdy but are imbued with lightness that allows movement with the slightest zephyr.

Pop up Relive the vibrancy of the '60s with a dose of Warhol. Marking the 25th anniversary of his death, a traveling exhibition called “15 Minutes Eternal” brings the largest collection of his work to Asia. Until 2014. warhol.org

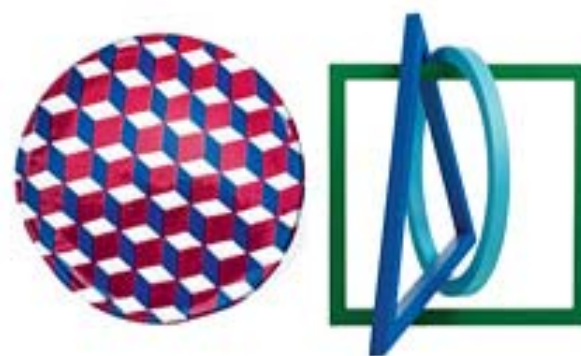

THE FACTORY

Andy Warhol’s predilection for weaving magic into the mundane is one of his lasting legacies. Credited for transforming everyday things into art, his works motivate designers to elevate the ordinary. Italian brand Seletti thrives on this theme, and especially appealing is their “Estetico Quotidiano” collection, which apes disposable items, making them permanent collections at home.

GEOMETRY CLASS

When it comes to visual impact, nothing beats geometric abstraction, so much so that it has become a fashion reference season in, season out. From Kandinsky to Mondrian, the manner in which shapes, angles, and lines are utilized to form a visually stunning canvas is a constant inspiration. Bring in their hard-edged elements via tabletop accessories that hint at this timeless style.
